Subject: northeast regional ocean planning project summaries

Hello RPB members,

Please see attached for newly available northeast regional ocean planning project summaries.

These products are outcomes of many recent NROC engagement efforts. Please note that the recreational boating, commercial fishing, and environmental NGO documents are interim products - engagement is still underway for these 3 projects so please keep as INTERNAL documents for your reference. The white papers and December workshop summaries have been sent out for comment and will be posted as final versions on the Ocean Planning Committee's website next week: <http://northeastoceancouncil.org/committees/ocean-planning/>

We hope these documents (especially the summaries, which provide key highlights and outcomes) will provide background and context for upcoming RPB member goal setting sessions. As a reminder, these sessions are scheduled by each sector for the following dates:

Federal - Wednesday, February 27

State - Wednesday, March 6

Tribes - see email sent today for a scheduling poll on March 4, 5, or 6

If you have questions about the attached summaries, please contact John Weber (jweber@northeastoceancouncil.org).

If you need more information about your sector's goal setting session, please contact Betsy, Grover, or Chief Getchell - your respective co-leads at:

betsy.nicholson@noaa.gov

gfugate@crmc.ri.gov

rgetchell@micmac-nsn.gov

We will be in touch soon with a draft agenda for our April meeting. In the meantime, enjoy some reading!

Katie
